Player's region code should be the same as region code of DVD disc. The DVD could have been exposed to humid conditions. If it has, remove the disc and keep the DVD Player powered up for at least two hours. Check to make sure it is a disc that the player will play. Like a DVD, CD or MP3. Be sure that the shuttle is also installed correctly.

manual in the world can help you fix it. The best solution is to replace the thing. However, before you replace it with a new motor, make sure you test the spindle motor and see what the RPM reading is. If you get a good RPM reading, then the spindle motor isn't the cause of the no disc problem. If you're an electronics ...
