[*The Shape Of Eye A*](#)

To determine eye shape, imagine a straight, horizontal line extending through the centers of both eyes. If the outer corners of your eyes are above the line, you have upturned eyes. If the corners are below it, you have downturned eyes. Next, check to see if your eyelid crease is visible or hidden when your eyes are open. If the crease is hidden, you have hooded eyes. Lastly, if you can see ...

The vitreous performs a vital role in protecting your eye. Most importantly, it helps it to hold its 'spherical' shape. The vitreous also comes in contact with the retina (the light-sensitive tissue at the back of the eye that acts like the film of a camera). The pressure of the vitreous humour helps to keep the retina in place.
